

**Embedded Systems
Development ... We've been
there from the start... Today,
still State of the Art ...**

Our experience dates back to the days of heavy metal main frames and we have kept pace with the dynamic computer field all along the way. We can

provide the experience to bring working projects in on time and within budget. We provide superior work habits and professional service for our clients.

**WE ARE STILL EXCITED TO
BE INVOLVED IN THE
EXCITING AND EXPANDING
EMBEDDED COMPUTER
TECHNOLOGY AREA**

**Contact us for discussions about
your future directions and plans in
the embedded technology area.**

**WHAT ELSE SHOULD I
KNOW?**

We are *motivated* to provide exceptional service and support to our clients. We have provided our clients with complete and verified systems in the past and will continue to do so in the future.

**Serving the Mission Critical
Software and Embedded
Computer Markets**

ABOUT THE MANAGEMENT

EXPERIENCE THAT BRINGS

YOUR PROJECT TO

SUCCESSFUL COMPLETION

Jove Technologies, LLC is staffed by experienced, highly educated and highly trained Computer and Software designers and developers. The principals of Jove Technologies, LLC have been delivering mission critical systems to clients in the Military and Medical markets for more than two decades and have been working as a team for more than five years while developing Medical Life Support Devices.

Success is ensured by:

1. *Well developed Life Cycle model.*
2. *Proven track record for delivery.*
3. *Use of Design and Development tools to ensure complete and accurate design completions.*

All seasoned software developers are aware that successful new product development requires proven management techniques.

ABOUT THE TECHNOLOGIES

We can provide expertise in the following technology areas:

- Embedded Real-Time Firmware and Systems
- System Requirements Analysis and Specification
- System Design
- System Test and Verification
- Unix and variants including LINUX
- Tools and laboratory interface
- MicroSoft certified developers

Credentials drive the current NEW economy which relies so heavily on Intellectual Property. We are proud of our credentials.

CREDENTIALS

Education is important in any professional endeavor and Jove Technologies is staffed by degreed Computer and Software Developers and Graduate level education is highly valued in all job functions.

The principals of Jove Technologies, LLC have active memberships in the Institute of Electronics and Electrical Engineers (IEEE), IEEE Bio-medical Engineering Society, IEEE Computer Society and the IEEE Engineering Management Society.

Our experience includes systems development, project leadership and management for large mission critical Military, Industrial, and

Medical markets as well as projects smaller in scope.

Also important is training and Jove Technologies, LLC personnel have received the most recent training available to ensure current methods and processes.

We can meet your Software and Firmware development requirements and allow you to concentrate on your core business needs.
